Expression of Interest (EOI)

Erection and Commissioning of Pulse Jet Bag Filter at Bokajan Cement Factory

Cement Corporation of India Limited invites expressions of interest (EOI) for the erection and commissioning of a Pulse Jet Bag Filter at Bokajan Cement Factory , Karbi Anglong, Assam. The design and equipment have been finalized, with the majority of the equipment already on-site and available for assessment. The civil structure is complete, and some equipment has been erected. Interested parties are requested to visit or send their representatives to assess the site and submit their best price for the remaining work, which includes the erection and commissioning of both electrical and mechanical equipment. The party shall be required to provide performance guarantee and hence may be allowed to make design changes provided there are no additional procurement costs or major design alterations.

Brief technical specifications are as under :

Objective of the Bag filter: The objective of the PJBH was to replace the old working ESP which due to time and new environmental norms have become inefficient.

Bag house : Capacity at bagfilter inlet = 1,61,000 cmh/hr at 240 °C , No. of Bags = 660 (Mastrulal), Filtering area = 2686.2 m²

ID Fan : Simply supported/Backward Curved /161000 m³/hr , Motor : 250 KW

The last date for submission of EOI is 21st October 2024.

Interested parties may contact for details at 9993586760/8638838134
